

FPC Food Styler

The FPC Food Styler offers a revolutionary development in the area of grill marking in the food industry. The machine makes it possible to apply lines, diamond shapes, names, and logos to a wide range of products.

The FPC Food Styler provides the product with patterns without touching it. The product is not pressed and this ensures that the loss of moisture is limited. By using a continuous and precise power adjustment, markings and logos can be applied to the product made without causing a risk of burning it. The FPC Food Styler is very flexible and is able to provide the product with any desired pattern. New programs can be set up quickly and easily. The FPC Food Styler also avoids generation of smoke and odours in the production room.

The machine can be implemented in a production line, but the FPC Food Styler may also be used as a stand-alone unit.

FPC Food Styler

- High yield
- No contact
- No burned spots
- Flexible programming
- Low energy consumption
- Clean working area
- Easy to operate and clean

FPC Food Styler

Food Processing Concepts

Food Processing Concepts develops durable, specialist appliances for the food industry. With more than 30 years of experience, FPC develops innovative, environmentally friendly machines that increase the efficiency of the production process and ensure an improved working environment.

Based on experience and development, FPC produces machines that are easy to use, and need little maintenance. Because of its unique and innovative approach, FPC has been successful for years on the international market.
