

FPC High Speed Link Cooker

FPC High Speed Link Cooker provides a quick and unique way to cook and finish a wide range of products with a continuous process.

The FPC High Speed Link Cooker evenly heats the product on all sides. This ensures that there is a maximum transmission of heat. The FPC High Speed Link Cooker is able to quickly change temperature, which limits product shrinking to a minimum and makes sure the product does not burn. It is possible to choose a light or dark colour for the product by changing the power input.

FPC High Speed Link Cooker:

- High speed cooking
- High yield
- Continuous system
- Minimum handling costs
- Small floor space
- Low emissions
- Easy to operate
- Modular system

FPC High Speed Link Cooker

Food Processing Concepts

Food Processing Concepts develops durable, specialist appliances for the food industry. With more than 30 years of experience, FPC develops innovative, environmentally friendly machines that increase the efficiency of the production process and ensure an improved working environment.

Based on experience and development, FPC produces machines that are easy to use, and need little maintenance. Because of its unique and innovative approach, FPC has been successful for years on the international market.
